

Milton Graves

Milton retired from Dalhousie University in 2015 where he taught in the Integrated Science Program and lectured in the Earth Sciences Department. He has a graduate degree in geology and an undergraduate degree with majors in geography and economics as well as geology. His academic interest is the interaction of earth processes with human economy. He has presented SCANS courses on dinosaurs and volcanos and served on the SCANS board for the last 2 years. His spare time is devoted to improving his lawn bowls game.
