Family Matters in 6 Japanese Films from the 18th Century to 2019 - Daphna Levit

Tuesdays	1:30 PM - 3:30 PM	(6 wks)	Oct 15 to Nov 19
Parkland Clayton Park, Cameron Hall, 114 Fairfax Drive, Halifax			

Course Description

Chikamatsu, the revered Japanese dramatist of the early 18th century, portrayed family within the samurai tradition as entirely subservient to the feudal hierarchy. The first movie will be a modern restoration of one of his plays by the director Mizoguchi. The second movie will be a 1958 Kabuki-like production directed by Kinoshita of *The Ballad of Narayama*: a multiple award-winning movie of a legendary tale about the dignity and sacrifice of older people. Both these movies depict an era long past but with enduring values within contemporary Japan.

The third movie is *Tokyo Story* a timeless 1953 family drama set in the 1950's by one of the greatest and most influential directors of film: Ozu. The family concept has evolved but the humanity remains constant. This movie is a few minutes longer than the 2 hours - and hopefully we can be allowed the time.

The last three movies are fairly contemporary and provide some satire, comic insight and perspective on the universal concept of family today: *The Funeral*, directed by Itami, *Our Little Sister* and *Shoplifters*, both directed by Kore-eda.

Should discussion time be insufficient, we can limit the course to five movies and dedicate one session exclusively to review and discussion.

Course Description

Narcissus, falling in love with his own reflection which he mistakes for a being separate from himself; the wicked Queen in Snow White, looking in a mirror to ascertain her beauty's permanence – this human obsession with one's own reflection, evidenced in myth and fairy tale, took form in the late 19th and early 20th c. as the idea of a double, an imagined twin or doppelganger. This course will study four short novels, in chronological order, each of which centers upon the possibility of a double, each having a different depiction of the consequences of such a possibility achieving reality. We will likely spend the first two sessions of the course on the Dostoyevsky (1846), the next two on the Wilde (1890-91), the following one on the James (1908) and the final session on the Conrad (1910). I will be referring in class to the Dover Publication edition of each of the books (all under \$10.00), but participants may wish to download all four online, from the free site, Project Gutenberg.

Instructor Biography

Dr. Rosenberg's interest is the British novels of the Victorian and Edwardian periods. Her particular area of study is the writing of Henry James, and she has written and lectured on his novels. Her students and friends will agree that her constant reference is to James' characters.

Filthy Lucre: A Brief (but Affectionate) History of Money - Alex Roberts

Thursdays 1:00 PM - 3:00 PM (6 wks) Oct 10 to Nov 14

‡ Keshen Goodman Public Library, 330 Lacewood Drive, Halifax ‡

Course Description

“Everyone always wants money because everyone else also wants money, which means you can exchange money for whatever you want.” – Noah Harari

Dough, scratch, bread, moolah, quid, greenbacks, yen, rupee, euros, bahts, bitcoin: money in its many forms permeates virtually every aspect of our financial, psychological and emotional lives. Indeed, we focus more of our time in the pursuit of money than any other human activity. It is also the essential back story that explains the origins of most great events: everything from the fall and rise of great empires to potentially catastrophic trade wars. Cultural anthropologist, Jack Weatherford goes as far as to argue, “Money is a plausible candidate for being the single most influential factor” shaping modern human progress, and the “definitive element of social life.”

Employing an accessible, entertaining, thought-provoking approach, this course will look at the world’s second most interesting topic by taking the student on a journey from the first coins through to 21st century digital currencies.

The course will include topics such as: the origin, evolution and characteristics of money, the psychology of spending, money and inflation, how banks create money (out of nothing), money systems in prisoner of war camps, stock market bubbles, digital currencies and the “blockchain”, money in music and literature, the allure of gambling, things money can’t buy, cognitive biases that cost you money, and the future of money.

Capitalism: From Prosperity to Inequality

Capitalism: From Prosperity to Inequality - Daphna Levit			
Wednesdays	1:00 PM - 3:00 PM	(6 wks)	Oct 16 to Nov 20
Douglas Street Recreation Centre, 40 Douglas Street, Truro			

Course Description

After Karl Marx, successive economists writing about the benefits of capitalism have long been giving guidance on how to reach material abundance and consumption plenty. Growth is considered essential and prosperity is expected to cure all social ills. Politicians, supported by wealthy corporate donors, perpetuated the promise of capitalist prosperity and continually rewarded these supporters, thus ensuring the continuity of a corporate growth system. The underbelly of prosperity, inequality, has been given less attention until fairly recently. Very few of those economists who pointed out the consequences of unrestrained capitalism on inequality have been American.

This course takes a look at the writings of some outstanding scholars in the late 20th and early 21st centuries in Europe and lately in the USA who bucked the trend and focused on the dramatic rise of the superrich, the expanding gap between the top and the bottom of the wealth ladder and the damaging effect this will continue to have in the free world.

This course will also provide a related glimpse into an economic pursuit that is beginning to grow: feminist economics.

(At the end of the course we will write our own treatise and march on Washington to protest the rise of gilded peacocks).
